

RECHAELOPES

SOFTWARE ENGINEER | AI & CLOUD APPLICATIONS

Mississauga | lopes.rechael1307@gmail.com | 437-979-7034 | [linkedin.com/in/rechael-lopes](https://www.linkedin.com/in/rechael-lopes)

SUMMARY

Fullstack and cloud-focused software engineer with experience building AI-driven and API-powered applications across frontend and backend systems. Skilled in developing scalable web applications, integrating REST APIs, optimizing application performance, and supporting cloud deployments in fast-paced environments. Experienced working with automation workflows, real-time data systems, and AI-powered applications while collaborating with cross-functional teams to deliver reliable and user-focused solutions. Passionate about applied AI, scalable systems, and building impactful technology products.

PROFESSIONAL EXPERIENCE

Web & Cloud Application Developer | iHelp International (Intern)

Jan 2026 - May 2026

- Developed and enhanced fullstack web application features, improving usability, responsiveness, and overall user experience across cloud-hosted platforms.
- Supported backend APIs, automation workflows, and cloud deployments while troubleshooting performance issues and optimizing system reliability.
- Collaborated with technical team to implement scalable solutions, improve workflows, and maintain production-ready application functionality.

Data & Operations Analyst | A1 Snehanjali

Oct 2021 - May 2023

- Supported backend systems and operational workflows through monitoring, debugging, and incident resolution to maintain reliable application performance.
- Assisted with API testing, deployment validation, and automation processes to improve operational efficiency and system stability.
- Worked cross-functionally with technical teams to analyze issues, improve workflows, and support data-driven operational improvements.

PROJECTS

Cloud Data Migration & Collaboration Solution | BTC Enterprise

<https://github.com/RechaelLop/Cloud-Migration>

(Python, Flask, Docker, AWS ECS, CloudWatch, REST APIs, Microsoft 365, SharePoint, Power BI, Power Platform, GitHub)

Developed a cloud-based automation and monitoring solution integrating APIs, logging tools, and scalable workflows to support reliable system operations and performance monitoring.

Stock Prediction Web Application | University of Mumbai

<https://github.com/RechaelLop/Stock-Prediction>

(Python, Streamlit, PostgreSQL), APIs, LSTM (Deep Learning), Power BI, CI/CD)

Built a fullstack AI-powered web application integrating machine learning models, APIs, and real-time analytics dashboards to deliver predictive insights and scalable user experiences.

SKILLS

Application & Tools: Microsoft 365, Docker, Jenkins, UI/UX Principles, Responsive Design, Power BI, GitHub Actions, AWS, Azure

Tech Stack: JSON, Scripting Languages, Python, SQL, PowerShell

Frameworks & APIs: FastAPI, Flask, REST APIs, Networking, System Design, API Integration

Databases: PostgreSQL, MySQL, MS SQL Server, SQLite, MongoDB, Amazon RDS

Others: Troubleshooting, Automation Workflow, Communication, Problem-solving, Incident Management & Reporting, Technical Proficiency, Documentation, Flexibility, Multitasking, Strong Analytical and Visualization Skills, Agile Mindset, Cross-functional collaboration

EDUCATION

Post Grad Diploma (Cloud Data Management) | Conestoga College

Sep 2023 - Dec 2024

Masters of Science (Information Technology) | University of Mumbai

Aug 2023 - July 2024

ACHIEVEMENTS

Certifications - AWS Cloud Practitioner Essentials, Microsoft Azure Fundamentals, AWS Machine Learning, Introduction to Data Analytics for Business

Award - Best Team (2019) Recognized for collaboration, technical problem-solving, and successful delivery of a team-based technology project.
